EarthGuard™

All Natural Ice Melter

The right thing, right now.

As environmental awareness sweeps the globe, people in all walks of life are looking for ways to effectively implement a greener philosophy at work and at home. From formal corporate initiatives to individual acts of responsibility, substituting EarthGuard™ All Natural Ice Melter for other, more harmful ice melting blends, is an intelligent, eco-conscious choice that can help improve the world in which we live.

EarthGuard™ is a unique, proprietary blend of sea salt and two fertilizers (urea and potassium chloride). Featuring a bright green safety color coating, EarthGuard™ was created to be a highly visible solution, reducing over-application while providing clear evidence that an ice melter is in use.

Safety Green Coating assures visible, complete coverage
